PROFESSIONAL SUMMARY

Computer Science and Engineering (Artificial Intelligence & Machine Learning) undergraduate with hands-on experience designing and building full-stack, mobile, AI/ML and student-focused digital products. Experienced with Python, JavaScript, TypeScript, React, Flutter, FastAPI, Firebase, REST APIs, PostgreSQL, Git/GitHub, LLM concepts and prompt engineering. Built multi-module platforms including CampusNet, RideToTrack, PayTrack and AI Career Hub, with emphasis on scalable architecture, authentication, role-based access, APIs, responsive UX, analytics and real-world problem solving.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Dart, HTML, CSS

AI/ML: Artificial Intelligence, Machine Learning, NLP, Computer Vision, OpenCV, LLMs, Prompt Engineering, Scikit-learn, TensorFlow, NLTK

Frontend/Mobile: React, Flutter, Responsive UI/UX

Backend/Data: FastAPI, Node.js, NestJS, REST APIs, PostgreSQL, Prisma, Firebase, DBMS

Security/Architecture: JWT, RBAC, Argon2, API authorization, verification workflows

Tools/Deployment: Git, GitHub, VS Code, Docker, Railway, Jupyter Notebook, Matplotlib

SELECTED PROJECTS

CampusNet — National Student, Mentor & Research Network

Designed and developed a scalable student, mentor, PhD scholar, project, research and event ecosystem. Defined role-based public, Organizer and Super Admin experiences; event discovery and registration; project/team collaboration; mentor matching; shared project workspaces; tasks, milestones and feedback; certificate generation with unique IDs/QR verification; institution and organization hubs; inter-institution collaboration; secure messaging; notifications; calendar; analytics; semantic search; AI-powered recommendations, teammate/mentor matching, research discovery, skill-gap analysis and project similarity; and verification, moderation, audit and security workflows.

Tech: Node.js, TypeScript, NestJS, PostgreSQL, Prisma, JWT, Argon2, RBAC, Redis/BullMQ, Socket.IO, S3/Cloudinary, Puppeteer, QR, Python/FastAPI, Docker, Railway

RideToTrack — GPS & Safety Tracking Mobile Application

Built a Flutter mobile application with a separate FastAPI backend for location/GPS tracking and safety-focused workflows. Structured the application into authentication, dashboard, tracking, safety, services, providers and model layers, with a web viewer and Docker-based setup. Backend deployed on Railway with API/Swagger access.

Tech: Flutter, Dart, FastAPI, Python, REST API, GPS/Location, Railway, Docker

PayTrack — Payment & Credit Tracking Platform

Developed and deployed a responsive financial tracking web application for monitoring ICICI and Slice accounts, paid and remaining amounts, upcoming dues, payment history, due-date reminders, credit utilization, monthly records, search/filtering, dashboards, charts and financial insights.

Tech: Web Development, JavaScript/TypeScript, Firebase, REST APIs, Responsive UI

CIVICONE — Civic / Digital Platform

Developed the CIVICONE project as part of a broader digital platform portfolio, focusing on practical user-facing workflows and modern web application design.

Tech: Web Development, JavaScript, UI/UX, GitHub

MediGuru — Healthcare Technology Project

Developed the MediGuru project as part of a practical application portfolio, applying software development concepts to a healthcare-oriented user experience.

Tech: Software Development, Web/App Development

AI Career Hub — AI/ML Career & Resume Toolkit

Built an interactive HTML/CSS/JavaScript prototype containing career-role prediction, resume keyword/ATS scoring, skill-gap analysis, project recommendations, interview-question generation, answer feedback and speech output. Implemented rule-based logic for role suggestions, ATS keyword checks and personalized project recommendations.

Tech: HTML, CSS, JavaScript, AI/ML concepts, ATS/Resume Logic

EXPERIENCE

AI/ML Intern — VaultSphere AI Technologies | 2 Months | Remote

Completed practical AI/ML training covering Python, NumPy, Pandas, data preprocessing, exploratory data analysis, machine learning algorithms, model evaluation, deep learning fundamentals and neural networks. Developed a Spam Mail Detection System using NLP and machine learning; performed text cleaning, tokenization, stopword removal and TF-IDF feature extraction, then trained Naive Bayes / Logistic Regression classifiers. Used Scikit-learn, NLTK, Matplotlib and Jupyter Notebook; tested, improved and documented the project.

EDUCATION

B.Tech — Computer Science & Engineering (Artificial Intelligence & Machine Learning) — Kuppam Engineering College, JNTUA | 2023–2027
| Pursuing

Intermediate — Kuppam Junior College, Kuppam | 2021–2023 | 72.8%

SSC — Narayana English Medium High School, Kuppam | 2020–2021 | 100%

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AI for Business Professional Certificate — HP LIFE
- Starting a Small Business — HP LIFE
- Digital 101 Journey — FutureSkills Prime / SSC NASSCOM
- APSSDC Skill Development Program
- JavaScript Training — EduPyramids / SINE, IIT Bombay

ADDITIONAL

Languages: English, Telugu, Hindi, Tamil | **Strengths:** Problem Solving, Teamwork, Communication, Self-Motivation, Goal Orientation
